

Schatten Autoharp Pickup Model AD-01

Thank you for purchasing one of our autoharp pickups. Each pickup is carefully hand built and tested to ensure that it meets our high standards for quality and durability.

Installation Instructions:

- a) The AD-01 is designed to mount to the back of the instrument on the outside. The suggested mounting position is on the center line of the sound hole approximately one to one and a half inches above the top edge of the sound hole. The diagram at the bottom of the page shows the back of the autoharp, with the 'X' indicating the suggested mounting position of the pickup.
- b) Use a piece of the double sided tape to mount the pickup in position. Care should be taken when removing the pickup or the double sided tape from the instrument, as the tape is extremely strong and damage to a soft finish may occur. In order to lessen the possibility of finish damage, it is suggested to weaken the tape's holding ability prior to mounting the pickup. This can be achieved by first applying the tape to the pickup and then allowing the sticky reverse side to repeatedly come into contact with blue jean material or carpet.
- c) The output jack may be mounted to the side of the autoharp using the supplied nylon mounting clip and screw.

Position of pickup on back of autoharp (X)

Warranty

We warrant to the original purchaser that our pickups are free from defects in materials and workmanship for a period of 2 (two) years. Should a product fail to perform properly within the specified warranty period you may contact your dealer or Schatten Design for instructions. No product will be accepted for warranty return by Schatten Design without a Return Authorization number.
