

Schatten Archtop Guitar Pickup Model AT-02

Thank you for purchasing one of our archtop pickups. Each pickup is carefully hand built and tested to ensure that it meets our high standards for quality and durability.

Installation Instructions:

- 1) The feet of the bridge must be fitted correctly to match the curve of the belly of the guitar. The bridge itself has some flex to the feet of the base and you may check the fit of the bridge by exerting a small amount of down pressure on the bridge to see how well the feet match the top. If the fit is not good, and if you are not comfortable doing the fitting of the bridge, then it is strongly suggested that you take your pickup and instrument to your local guitar builder/ repair person or luthier to have the work done professionally.
- 2) Reasonable care should be taken when handling the pickup until it is installed. The lead wire from the pickup is quite flexible and is not prone to breakage. Please refrain from any excessive pulling or tugging on the lead wire.
- 3) The piezo crystal is located in a channel routed into the underside of the bridge's top saddle. That channel is 1/8" in width and is 1/4" in depth as measured from the bottom of the saddle.
- 4) If it is necessary to reduce the physical height of the bridge, some material may be removed from the bridge base unit, as well, the saddle unit may be recut slightly from its top surface. No material can be removed from underside of the saddle or from the area where the saddle rests on the height adjusting wheels. Any removal of wood from the compensated top area of the saddle should be done with caution so as not to weaken the saddle unnecessarily.
- 5) The output jack provided, or one of your own supply, should be solidly anchored to the guitar so that no undue strain is placed on the lead out wire. The pickup comes prewired to a 1/4" inline jack.
- 6) The piezo crystal in the bridge is extremely sensitive and is quite high in output. Please make sure that you take the time to adjust the volume on your amp when first using the pickup

Warranty

We warrant to the original purchaser that our pickups are free from defects in materials and workmanship for a period of 2 (two) years. Should a product fail to perform properly within the specified warranty period you may contact your dealer or Schatten Design for instructions. No product will be accepted for warranty return by Schatten Design without a Return Authorization number.
