

# Neo Jacks - Resonator Guitars

The Neo Jack for resonator guitars provides an intelligent and secure method of mounting a standard 1/4" output jack to an instrument without drilling a hole in the side of the guitar.

The Neo Jack is contoured to fit over any standard resonator guitar tailpiece and is secured in place by the existing strap button.

---

# Neo Jacks - Archtop & Gypsy Jazz

The Neo Jack for Selmer gypsy jazz guitars and archtop guitars mounts using the existing screws and screw holes which secure the tailpiece to the instrument.

---

# Neo Jacks - Mandolin & Bouzouki

The Neo Jack for mandolin and bouzouki is shaped to fit the curvature of these instruments. Utilizing the same upper two mounting screws the Neo Jack fits directly over the existing Gibson style tailpiece.

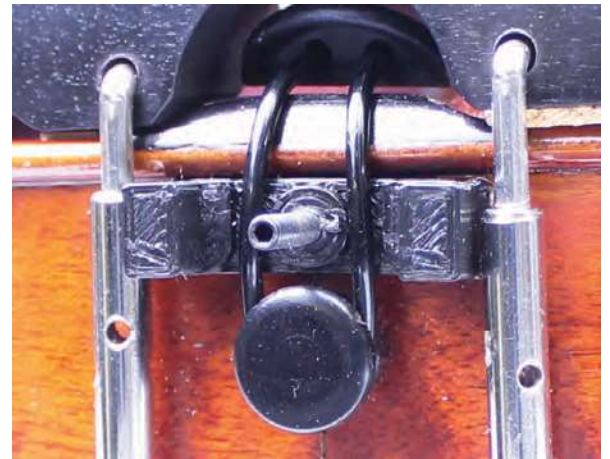

## Neo Jacks - Violin & Viola

The Neo Jack for violin provides a more secure method of mounting an output jack to a violin. Instead of clamping a jack assembly to the top of a violin, the new Neo Jack mounts at the butt of the instrument utilizing the existing violin tail gut as its mounting point.

The back bracket is inserted between the tail gut and the violin body. When the strings are up to tension this back bracket is securely held in place and provides the means of mounting the Neo Jack.

The Neo Jack slides into place on the back bracket and is secured to the back bracket with a small nylock nut

The Neo Jack is available with a 1/8" jack or a standard 1/4" jack.

1/8" Output Jack

1/4" Output Jack
